Abstract

An abstract.

Introduction

$$(x;y)_z$$

$$\sinh(x)$$

$$\sinh x$$

$$(\alpha)_G$$

$$(x;y)_z \sinh(x) \sinh x (\alpha)_G$$

This is inline $(x;y)_z \sinh(x) \sinh x (\alpha)_G$.

$$(\alpha, k)$$

$\in$

$$\mathop{\mathrm{K}}_{i=1}^{10} \frac{x_i}{y_i} = \sum_{n=1}^{2} f_n$$
